

MED/FM for Radiology *Practice Management & RIS*

MED/FM for Radiology is a combination of CPU's comprehensive MED/FM software and our radiology information system (RIS), providing billing, appointment scheduling, film tracking, transcription, and mammography tracking under one platform.

CPU Advantages

CPU provides a totally integrated RIS solution for radiology imaging and office-based practices. MED/FM for Radiology tackles administrative tasks with ease and accuracy, improves efficiency, and increases collections.

- Outstanding service, support, and training
- Customer-oriented software developer
- Over 23 years experience developing software for the healthcare industry

Appointment Scheduling

CPU's scheduling tool is designed to maximize resources. Users can schedule for multiple locations by physician, resource, or procedure.

- Film pull list
- Preauthorization
- First available search
- Appointment history
- Integrated registration
- Staff productivity reports
- Prep and screening notes
- Multi-resource scheduling
- Encounter form generations
- Scheduler preference defaults
- Flash card and film jacket labels

Transcription

Data flows seamlessly from MED/FM for Radiology's transcription module to Microsoft Word documents, creating headers with patient information, storing boilerplate text, and listing all procedures to be reported.

- On-line approvals
- Faxing capabilities
- User-defined shell documents
- RIS to Dictation system HL7 Interfaces

Film Tracking

MED/FM tracks completed reports and automatically faxes reports to referring physicians. Films are tracked in and out of the department via a bar-code transfer system.

- Teaching film file
- Bar code capabilities
- RIS to PACS HL7 interfaces

Mammography

- Patient recall letters
- Clinical and pathological results tracking
- MQSA compliant mammography reporting

MED/FM for Radiology *Practice Management & RIS*

Monitor how long patients have been waiting and track personnel productivity with MED/FM.

MED/FM's scheduling module is designed to maximize your resources. Schedule for multiple locations by physicians, resources, or procedures. MED/FM's resource scheduler provides an electronic wait list, recall options and a patient tracker.
